
The vaccine cavalry

5th December 2020

Contents

- Purpose of PPT is to point readers who are interested in the vaccine to relevant data sources which we have collated here.
- The wording is careful here, given the desire of Neil Basu and others to repress sensible debate. In most cases there are direct quotes from external sources.
- Section headings:
- The Government got COVID-19 wrong from day 1.
- Enormous wastage to date.
- The Pfizer vaccine + and -.
- Conclusions

The Government got this wrong

- This conclusion is not 20-20 hindsight, right from the beginning it was clear that Ferguson's model was wrong. Even as non-epidemiologists we understood that (see tweet).
- That initial over-estimate has created panic which drove all other catastrophic policy responses.
- Panic and fear were and are still being used as tools to control the population (SPI-B).

Mechanical ventilators purchases based on model

- This shows how well the model predicted the severity and trajectory of the virus – 30,000 mechanical ventilators purchased based on model.

Vaccine candidates – we focus on Pfizer

FEATURE

Table 1 | Characteristics of ongoing phase III covid-19 vaccine trials

	Moderna	Pfizer	AstraZeneca (US)	AstraZeneca (UK)	Janssen	Sinopharm*	Sinovac
Vaccine name	mRNA-1273	BNT162	AZD1222	AZD1222	Ad26.COV2.S	Sinopharm vaccine	Sinovac CoronaVac
Registration No	NCT04470427	NCT04368728	NCT04516746	NCT04400838 (UK), NCT04536051 (Brazil), NCT04444674 (South Africa)	NCT04505722	NCT04510207	NCT04456595
Target enrolment	30 000	43 998	30 000	19 330	60 000	45 000	8870
Ages eligible	18+	12+	18+	5-12, 18+	18+	18+	18+
Protocol publicly available	Y	Y	Y	Nt	Y	N	N
Notable excluded populations:							
Children and adolescents	Excluded	Many excluded	Excluded	13-17 excluded	Excluded	Excluded	Excluded
Immunocompromised patients	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded
Pregnant or breastfeeding women	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded
Endpoints undergoing formal study†:							
Prevention of symptomatic disease in vaccine recipient	Y	Y	Y	Y	Y	Presumably§	Y
Reduction in severe covid-19 (hospital admission, ICU, or death)	N	N	N	N¶	N	N	N
Interruption of transmission (person to person spread)	N	N	N	N	N	N	N

* This trial is separately randomising an inactivated SARS-CoV-2 vaccine (vero cell) manufactured by Wuhan Institute of Biological Products Co and Beijing Institute of Biological Products Co.

The risks to you – expressed in days*

Over peak 16 weeks, 3 Covid deaths in > 7 million 5-14 year-old school-children, 138 deaths from other causes. 1 in 50 over-90s died with Covid, around 31% increase over normal death rate. Average Covid risk around 30-35% added to normal risk for over 55s, much less for under 55s

Age	COVID deaths	Population	COVID rate per 100,000	COVID rate as %	COVID rate as 1 in ..	Non-covid deaths	5-year average	COVID as % of 5-year average	Equivalent days of normal risk
0-4	3	3,515,430	0.1	0%	1 in 1,171,810	848	932	0%	0
5-14	3	7,159,102	0	0%	1 in 2,386,367	138	179	2%	2
15-24	33	6,988,755	0.5	0%	1 in 211,780	470	659	5%	6
25-34	128	7,998,302	1.6	0%	1 in 62,487	1,141	1,295	10%	11
35-44	369	7,460,856	4.9	0%	1 in 20,219	2,577	2,610	14%	16
45-54	1,283	8,142,528	15.8	0.02%	1 in 6,346	6,577	6,449	20%	22
55-64	3,476	7,019,590	49.5	0.05%	1 in 2,019	13,565	12,722	27%	31
65-74	7,319	5,906,928	123.9	0.12%	1 in 807	27,184	26,617	28%	31
75-84	16,043	3,476,922	461.4	0.46%	1 in 217	47,729	45,300	35%	40
85-89	10,160	918,437	1106.2	1.11%	1 in 90	30,703	29,108	35%	39
90+	10,790	528,959	2039.9	2.04%	1 in 49	37,815	33,722	32%	36
All	49,607	59,115,809	83.9	0.08%	1 in 1,192	168,747	159,593	31%	35

- From Tweet from David Spiegelhalter.
- Risk of dying from COVID during peak of first wave was equivalent to 0-40 days of normal everyday risk. Highly age dependent.
- If you take vaccine at 25-34 you will theoretically “save” 11 days of normal life risk (calculated during peak 16 weeks).
- Gov reportedly bought 250 – 350 million shots of vaccine.

* See definition

The key thing is what the vaccine doesn't do

- A rough summary is that two groups were split into 22,000 each – the group without the vaccine ended up with 162 infected – the second group with the vaccine ended up with 8 infected.
- Again necessary to think about numbers = net benefit for 154 people (95% versus do nothing) from 22 thousand vaccination – those 22 thousand had to take a new type of vaccine stored at -70 C to achieve that outcome with associated risks.
- What the trial did NOT establish is;
 1. Whether the vaccine stops transmission, OR
 2. Whether it prevents severe symptoms leading to hospitalisation/ICU (assumption is yes)

Potential drawbacks and Precautions for Use

- Since this is very sensitive subject, will only refer to two external sources (read yourselves);
 - One is the Government's official "Reg 174 Information for UK Healthcare Professionals", and
 - A petition by Dr Wolfgang Wodarg and Dr Michael Yeadon seeking to stop Stage III trials in Europe until various approaches to the research are changed (notably use of PCR).

https://2020news.de/wp-content/uploads/2020/12/Wodarg_Yeadon_EMA_Petition_Pfizer_Trial_FINAL_01DEC2020_EN_unsigned_with_Exhibits.pdf

Compulsion

- Despite the outstanding questions both in the UK and US there is a lot of talk of compulsion, or relative discrimination.
- Text shows Government wording around vaccination compulsion using word “however”.
- New York State Bar Association similarly wants to allow public health authorities to be able to compel people to take vaccine when “necessary”.

<https://petition.parliament.uk/signatures/98893205/signed>

We believe it is everyone’s responsibility to do the right thing for their own health, and for the benefit of the wider community. There are currently no plans to introduce a Covid-19 vaccine in a way that penalises those who do not take up the vaccine. However, the Government will carefully consider all options to improve vaccination rates, should that be necessary.

The Nuremberg Code

1. THE VOLUNTARY CONSENT OF THE HUMAN SUBJECT IS ABSOLUTELY ESSENTIAL. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any

@Thinkingslow1

Unnecessary:
signed M
Hancock

Totalitarian regime

- The moves to compel us to take a vaccine are part of broader trend towards a totalitarian state. The individual cannot be allowed to weigh up potential benefits (11 days of life risk) versus the warnings in UK Reg 174 information document.
- People who don't know my circumstances will decide - generally they are same people who have so far gotten everything wrong about the virus and associated policy response.
- There will be a debate in Parliament on discrimination against those who have not taken vaccine in December and we will post Word doc on site as a template letter to MP in case anyone wants to use it.
- We encourage you to read the links for yourselves.

Days of risk

Number of Covid deaths for a given age category, total number of deaths – Covid deaths = non Covid deaths. Days of risk from exposure to Covid = time period in days in which deaths took place * Covid deaths/Non Covid deaths = a number of days of risk/
